

TERMITE FREE

Wazary[®]

 **SUMITOMO CHEMICAL**
Environmental Health Division

WAZARY 10FL

CHARACTERISTICS

Long residual efficacy
Strong repellent efficacy

Easy to store and handle
Less irritation and smell

Low mammalian toxicity
Safe for the environment

DIRECTION FOR USE

Dilution

Make 20-50 fold dilution(0.2-0.5%a.i.)

To make 200L of dilution solution

1. Pour 4 to 10 liter of WAZARY 10FL into a 200L capacity tank.
2. Add water to fill up the tank . Agitate well while adding water.
3. Continue to agitate to avoid the separation after dilution.

Treatment

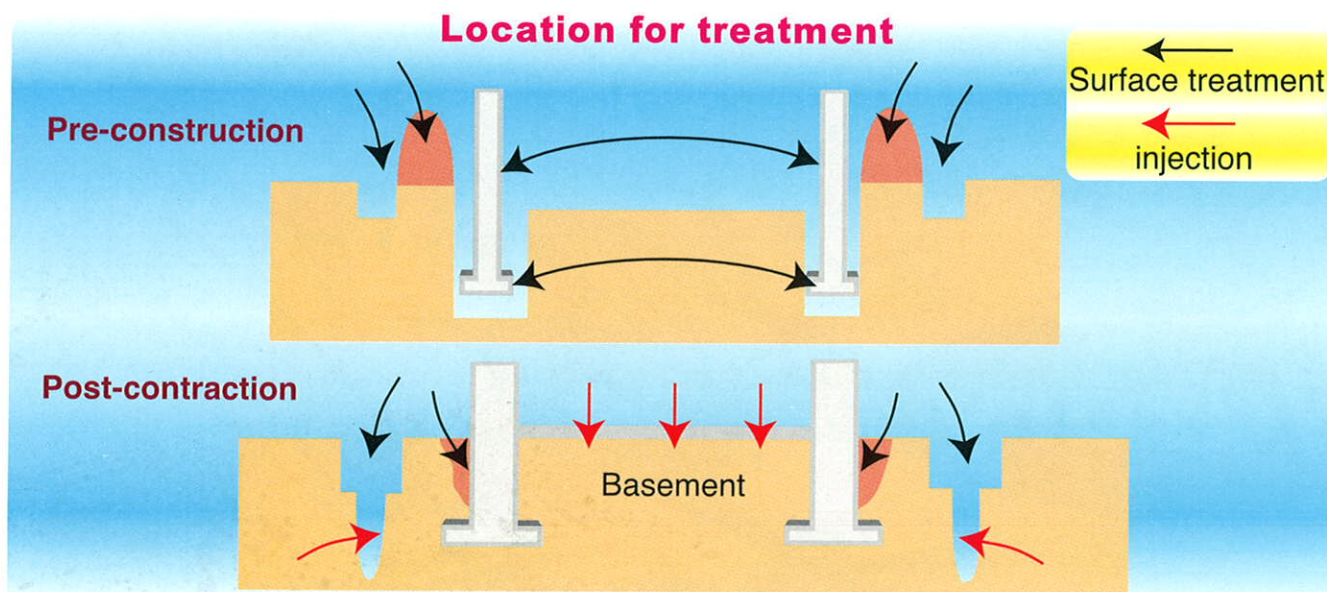

There are two types of treatment methods for termite control with "WAZARY 10FL".

Surface treatment

Apply(Spray) diluted WAZARY 10FL at the rate of 3-6L/m² with sprayer on ground.

Soil injection

Make holes with electric drill in the concrete slab at intervals of 0.5-1.0m.
Apply 3-6L of diluted WAZARY 10FL to each hole with a soil injector.

PRECAUTION

1. Irritating to eyes and skin.
2. Wear airtight mask, eye protection and gloves when handling the concentrate and spraying to avoid getting on mouth, skin, in eyes.
3. Do not contaminate ponds, rivers, wells etc.
4. Do not discard empty insecticide containers : give them to waste removal specialists.
